

KL Divergence

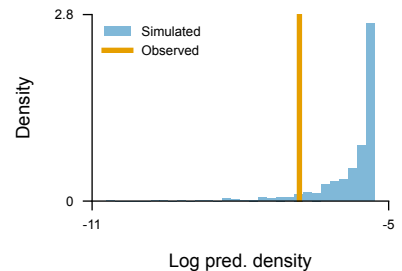

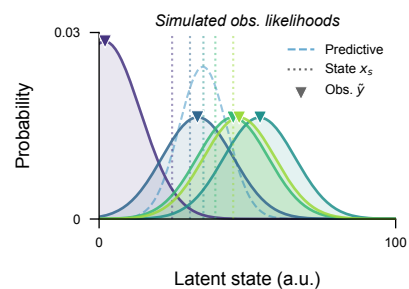

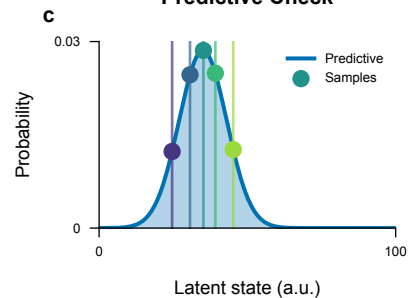

$$D_{\text{KL}} = \sum \text{pred} \cdot \log(\text{pred}/\text{like}) = \mathbf{2.30}$$

Predictive Overlap

$$\frac{|H_{\text{pred}} \cap H_{\text{like}}|}{\min(|H_{\text{pred}}|, |H_{\text{like}}|)} = \frac{14.6}{31.7} = \mathbf{0.46}$$

Predictive Check

$$p = P(T^{\text{rep}} \leq T^{\text{obs}}) = \mathbf{0.07}$$
