

KL Divergence

Log Ratio

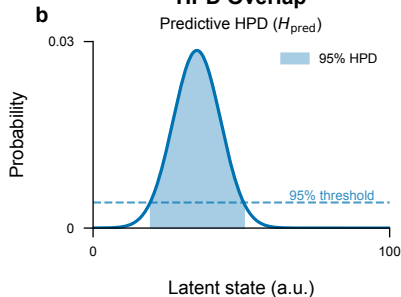

Pointwise KL: pred $\times$ log ratio

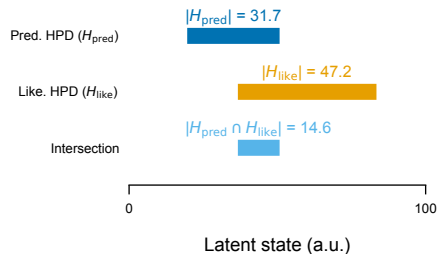

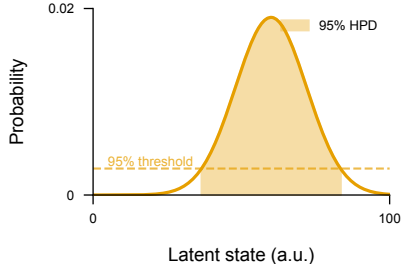

$$D_{\text{KL}} = \sum \text{pred} \cdot \log(\text{pred}/\text{like}) = 2.30$$

Predictive Overlap

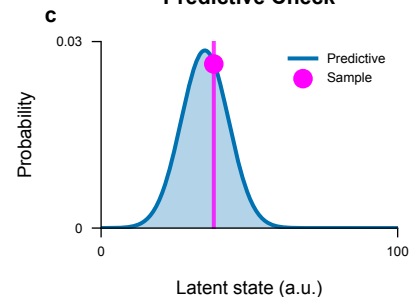

Likelihood HPD (H_{like})

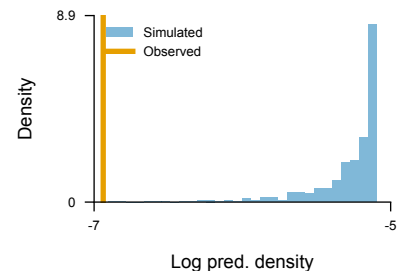

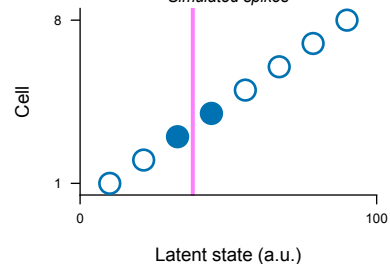

$$\frac{|H_{\text{pred}} \cap H_{\text{like}}|}{\min(|H_{\text{pred}}|, |H_{\text{like}}|)} = \frac{14.6}{31.7} = 0.46$$

Predictive Check

Simulated spikes

$$p = P(T^{\text{rep}} \leq T^{\text{obs}}) = 0.00$$
